All-in-One Datasheet (Beta) Produced by DBExpert

## Overview

Oracle Enterprise Edition on an elastic VM, managed using the Console, APIs, CLIs, Enterprise Manager, or SQL Developer. Enterprise Edition includes all Standard Edition features and adds additional database features such as Data Guard and the Enterprise Management Packs for Data Masking and Subsetting, Tuning, and Diagnostics. OCPU size is limited only by the VM capacity. All of the Base Database Service editions include Data Safe and Oracle Database Transparent Data Encryption (TDE).

## Capacity

<b>Configuration Options</b>	Base Database Service supports flexible shapes. When you create an instance using a flexible shape, you select the number of OCPUs that you require for the workloads that run on the instance. Flexible shapes let you customize the number of OCPUs allocated to the instance. This flexibility lets you build instances that match your workload, enabling you to optimize performance and minimize cost. The amount of memory allowed is based on the number of OCPUs selected, and the ratio of memory to OCPUs depends on the shape.
<b>CPU Range</b>	1 to 64 OCPUs
<b>Shapes</b>	VM.Standard3.Flex OCPUs: 1 to 32 Max DB TB: 80 VM.Standard.E5.Flex OCPUs: 1 to 64 Max DB TB: 80
<b>CPU scaling</b>	Offline
<b>Storage scaling</b>	Online
<b>Max IOPs</b>	8K: 640k

<b>Max Throughput</b>	5000 MBPs
<b>Max Memory</b>	16 GB per OCPU up to 1 TB
