Capacity

Configuration Options	Base Database Service supports flexible shapes. When you create an instance using a flexible shape, you select the number of OCPUs that you require for the workloads that run on the instance. Flexible shapes let you customize the number of OCPUs allocated to the instance. This flexibility lets you build instances that match your workload, enabling you to optimize performance and minimize cost. The amount of memory allowed is based on the number of OCPUs selected, and the ratio of memory to OCPUs depends on the shape.
CPU Range	1 to 64 OCPUs
Shapes	VM.Standard3.Flex OCPUs: 1 to 32 Max DB TB: 80 VM.Standard.E5.Flex OCPUs: 1 to 64 Max DB TB: 80
CPU scaling	Offline

Storage scaling	Online
Max IOPs	8K: 640k
Max Throughput	5000 MBPs
Max Memory	16 GB per OCPU up to 1 TB
