

Autonomous Data Warehouse on Dedicated Infrastructure

All-in-One Datasheet (Beta) Produced by DBExpert

Overview

Oracle Autonomous Data Warehouse on Dedicated Infrastructure (ADW-D) is a fully automated, high-performance, and elastic service. It delivers all of the performance of the market-leading Oracle Database in a fully automated environment that is tuned and optimized for data warehouse workloads, hosted on a dedicated Exadata - compute, storage, network and database service for a single tenant. Dedicated deployment provides for the highest levels of security isolation and governance. The customer has customizable operational policies for Autonomous Operations: workload placement, workload optimization, update scheduling, availability level, over-provisioning and peak usage.

Visit the [DB Expert Services Taxonomy page](#) to get the latest version of this data sheet and see data sheets for all of the Oracle Cloud Database services.

Deployment

| | |
|---------------------------------|---|
| Database Type | Single Database, Database Consolidation Pool |
| Management Model | Fully Managed PaaS |
| Supported Cloud Environments | Oracle Cloud Infrastructure and Oracle Database@AWS |
| SKUs for starting configuration | B95712 (ECPU) or B95714 (ECPU BYOL) 2* Database Server - X11M - B110627 3* Storage Server - X11M - B110629 Backup storage - B91628 |
| DB Versions Supported | Oracle 23ai (Long-term release), Oracle 19c (Long-term release) |
| Hardware Infrastructure | Dedicated Engineered System |

Usage Models

| | |
|-----------------------|--|
| Recommended Workloads | Analytics Blockchain Data Lake Data Science / Machine Learning Data Warehouse / Data Mart Data and IoT Event Streams Graph |
|-----------------------|--|

| | |
|--------------------------------------|--|
| | Vector |
| Recommended Data Models | Document Store (JSON) Document Store (XML) Spatial Text Vector |
| Certified Oracle Applications | Oracle APEX Oracle Fusion Middleware - Data Access Only 14.1.2.0.0 |

Capacity

| | |
|------------------------------|---|
| Configuration Options | <p>Elastic X11M infrastructure configuration shapes range from 2 database and 3 storage servers, up to a total of 32 database and 64 storage servers to achieve the exact ratio of compute to storage required. Each database server provides 720 ECPUs, and each storage server provides 64 TB of database storage (no local backup).</p> <p>Elastic configuration example 1 is the minimum size elastic configuration with 2 database and 3 storage servers. Elastic configuration example 2 with 8 database and 8 storage servers and elastic configuration example 3 with 2 database and 14 storage servers are example elastic configurations that provide the highest SQL Read IOPS and Bandwidth in a theoretical single rack, respectively.</p> |
| CPU Range | 2 to 21504 ECPUs |
| Shapes | <p>Exadata Cloud Infrastructure X11M - Elastic Configuration Example 1 ECPUs: 8 to 1520 Max DB TB: 192</p> <p>Exadata Cloud Infrastructure X11M - Elastic Configuration Example 3 ECPUs: 8 to 1520 Max DB TB: 896</p> <p>Exadata Cloud Infrastructure X11M - Elastic Configuration with Maximum Storage ECPUs: 8 to 1520 Max DB TB: 4096</p> <p>Exadata Cloud Infrastructure X11M - Elastic</p> |

| | |
|------------------------|--|
| | Configuration Example 2 ECPU: 8 to 6080 Max DB TB: 512 Exadata Cloud Infrastructure X11M - Elastic Configuration with Maximum ECPU ECPU: 8 to 24320 Max DB TB: 192 |
| CPU scaling | Online, Auto scale up, Auto scale down |
| Storage scaling | Online |
| Max IOPs | flash 8k: 2.8M read + 1M write (per storage server) |
| Max Throughput | 100 GB/s |
| Max Memory | 1.35TBx32 = 44 TB |

Availability

| | |
|--|---|
| Nines of availability (may require configuration) | 99.995 SLA (with Autonomous Data Guard) |
| Oracle DB Maximum Availability Architecture medals (for OCI / Cloud@Customer deployments) | Silver, Gold, Platinum |
| Automated backups max retention | up to 95 days |
| Long-term backup retention (up to 10 years) | Yes |

Functionality Included

| | |
|--|--|
| Included Oracle DB Options for license-included service (*) | Advanced Compression Advanced Security Database In-Memory Database Vault Label Security Multitenant Partitioning Real Application Clusters (Oracle RAC) Real Application Testing Spatial and Graph |
| Included Oracle EM Packs for license-included service (*) | Cloud Management Pack for Oracle Database (functionality provided by service) Data Masking and Subsetting Pack (functionality provided by service) Database Lifecycle Management Pack for Oracle Database (functionality provided by service) Diagnostics Pack Tuning Pack |
| Free Add-Ons (no extra licensing required) | Eligible target for loading data using Oracle |

| | |
|--|--|
| | Data Integrator, available on Cloud Marketplace (No license required if ADB is the target. Compute resources are charged.) Managed Oracle REST Data Services (ORDS) for ADB-D Oracle APEX Oracle Analytics Desktop Oracle Cloud Observability and Management Service (O&M) Oracle Data Safe Oracle Database Actions Oracle GoldenGate 1) Limited Use Term License Promotion and 2) Oracle GoldenGate Database Migration Term (both available on Oracle Cloud Marketplace) |
|--|--|

Locations

Oracle Cloud Infrastructure

APAC: AU Gov Southeast - WGA, Chuncheon - YNY, Hyderabad - HYD, Melbourne - MEL (G), Mumbai - BOM (G), Osaka - KIX, Seoul - ICN (A), Singapore - SIN (A, G), Singapore West - XSP, Sydney - SYD (G), Tokyo - NRT (A, G)

EMEA: Abu Dhabi - AUH, Amsterdam - AMS (A), Dubai - DBX, EU Sovereign Central - STR, EU Sovereign South - VLL, Frankfurt - FRA (A, G), Jeddah - JED, Jerusalem - MTZ, Johannesburg - JNB (A), Jovanovac - BEG, London - LHR (A, G), Madrid - MAD (G), Marseille - MRS, Milan - LIN, Newport - CWL, Paris - CDG, Riyadh - RUH, Stockholm - ARN, UK Gov South - LTN, UK Gov West - BRS, Zurich - ZRH (G)

LAD: Bogota - BOG, Monterrey - MTY, Queretaro - QRO, Santiago - SCL, Sao Paulo - GRU (G), Valparaiso - VAP, Vinhedo - VCP (A)

North America: Ashburn - IAD (A, G), Chicago - ORD, Montreal - YUL (G), Phoenix - PHX (A), San Jose - SJC (A), Toronto - YYZ (A, G), US DoD East - RIC, US DoD North - PIA, US DoD West - TUS, US Gov East - LFI, US Gov West - LUF

* New services and hardware generations are rolled out across regions, check your region for current status. (A) = Interconnect to Microsoft Azure available. (G) = Interconnect to Google Cloud available

Azure

None to date. Visit the Multicloud Updates page (link below) to check on potential roadmap items.

Google Cloud

None to date. Visit the Multicloud Updates page (link below) to check on potential roadmap items.

AWS

North America: us-east-1, us-west-2

[Multicloud Updates](#)

Operational Controls

| | |
|--|-----|
| Allows installing additional software/agents on the host | No |
| Allows installing OS packages | No |
| Allows kernel changes | No |
| Allows OS runtime changes | No |
| Allows sysdba access | No |
| Oracle operator access control | Yes |
| Control DB patch level | Yes |
| Control DB release update (RU) level | Yes |
| Control DB version | Yes |
| Control maintenance window | Yes |
| Preview and Validate Patches for Zero-Regression SLO | Yes |

Additional Information

| | |
|---|-------------------------|
| Open Source DB | No |
| Delta Sharing / Cloud Links | Delta Sharing Recipient |
| Select AI to Generate SQL from Natural Language Prompts | Yes |
| Mongo-compatible API | Yes |
| Supports non-CDB home | No |

The Responsibility Model for Oracle Autonomous Database

| Task | Who | Details |
|---|----------|--|
| Provisioning Autonomous Database resources | Oracle | Oracle is responsible for provisioning resources. You the customer are responsible for initiating provisioning requests that specify configuration characteristics of the resource being provisioned. |
| Backing up databases | Oracle | Oracle is responsible for backing up databases on a daily basis and for retaining database backups for 60 days. |
| Recovering a database | Oracle | Oracle is responsible for recovering databases. You the customer are responsible for initiating a recovery request that specifies which existing backup to recover to. |
| Patching and upgrading | Oracle | Oracle is responsible for patching and upgrading all Autonomous Database resources. |
| Scaling | Oracle | Oracle is responsible for scaling Autonomous Databases. You the customer are responsible for initiating scaling requests. |
| Monitoring service health | Oracle | Oracle is responsible for monitoring the health of Autonomous Database resources and for ensuring their availability as per published guidelines. |
| Monitoring application health and performance | Customer | You the customer are responsible for monitoring the health and performance of your applications at all levels. This responsibility includes monitoring the performance of the database queries and updates your applications perform. |
| Application security | Customer | <p>You the customer are responsible for the security of your applications at all levels. This responsibility includes Cloud user access to Autonomous Database resources, network access to these resources, and access to database data.</p> <p>Oracle ensures that data stored in Autonomous Databases is encrypted and ensures that connections to Autonomous Databases require TLS 1.2 encryption and wallet-based authentication.</p> |
| Auditing | Oracle | <p>Oracle is responsible for logging REST API calls made to Autonomous Database resources and for making these logs available to you the customer for auditing purposes.</p> <p>Oracle is responsible for ensuring that Autonomous Databases are provisioned with Oracle Database auditing features enabled. You the customer are responsible for using these features to audit database usage.</p> |
| Alerts and Notifications | Oracle | Oracle is responsible for providing an alert and notification feature for service events. You the customer are responsible for monitoring any database alerts that may be of interest. |
