

Oracle Autonomous Database Developer on Exadata Cloud@Customer Autonomous Data Warehouse

All-in-One Datasheet (Beta) Produced by DBExpert

Overview

Autonomous Database for Developers instances are free Autonomous Databases that developers can use to build and test new applications. With Autonomous Database for Developers instances, you can try new Autonomous Database features for free and apply them to ongoing or new development projects. Developer database comes with limited resources and is, therefore, not suitable for large-scale testing and production deployments. When you need more compute or storage resources, you can transition to a paid database licensing by cloning your developer database into a regular Autonomous Database.

Visit the <u>DB Expert Services Taxonomy page</u> to get the latest version of this data sheet and see data sheets for all of the Oracle Cloud Database services.

Deployment

| Database Type | Single Database |
|---------------------------------|---|
| Management Model | Fully Managed PaaS |
| Supported Cloud Environments | Cloud@Customer |
| SKUs for starting configuration | B98278 (ECPU) |
| DB Versions Supported | Oracle 23ai (Long-term release), Oracle 19c (Long-term release) |
| Hardware Infrastructure | Dedicated Engineered System |

Usage Models

| Recommended Workloads | Analytics Blockchain Data Lake Data Science / Machine Learning Data Warehouse / Data Mart Data and IoT Event Streams Graph Vector |
|-------------------------|---|
| Recommended Data Models | Document Store (JSON) Document Store (XML) NoSQL Spatial |

<u>oracle.com/dbexpert</u> 14 Jul 2025 Page 1

| | Text Vector |
|-------------------------------|--|
| Certified Oracle Applications | Oracle APEX Oracle Fusion Middleware - Data Access Only 14.1.2.0.0 |

Capacity

| Configuration Options | Each developer database comes with the following specifications: Compute: Fixed 4 ECPUs, with no CPU scaling Storage: Fixed 32 GB (~ 20 GB of DATA) Session limits: 30 concurrent database sessions Workload type: Autonomous Data Warehouse, Autonomous Transaction Processing |
|-----------------------|--|
| CPU Range | 4 to 4 ECPUs |
| Shapes | ADB-C@C NewDev ECPUs: 4 to 4 Max DB TB: .02 |
| CPU scaling | N/A |
| Storage scaling | Fixed storage size |
| Max IOPs | N/A |
| Max Throughput | N/A |
| Max Memory | N/A |

Availability

| Nines of availability (may require configuration) | 99.5 SLO |
|---|-------------------|
| Oracle DB Maximum Availability Architecture | Not MAA certified |
| medals (for OCI / Cloud@Customer deployments) | |
| Automated backups max retention | up to 95 days |
| Long-term backup retention (up to 10 years) | No |

Functionality Included

| Included Oracle DB Options for license-included service (*) | Advanced Compression Advanced Security Label Security Partitioning Real Application Clusters (Oracle RAC) Spatial and Graph |
|---|--|
| Included Oracle EM Packs for license-included service (*) | None |
| Free Add-Ons (no extra licensing required) | Managed Oracle REST Data Services (ORDS) for ADB-D Oracle APEX Oracle Database Actions Oracle GoldenGate 1) Limited Use Term License Promotion and 2) Oracle GoldenGate Database Migration Term (both available on Oracle Cloud Marketplace) |

Multicloud Updates

Operational Controls

| Allows installing additional software/agents on the host | No |
|--|-----|
| Allows installing OS packages | No |
| Allows kernel changes | No |
| Allows OS runtime changes | No |
| Allows sysdba access | No |
| Oracle operator access control | Yes |
| Control DB patch level | Yes |
| Control DB release update (RU) level | Yes |
| Control DB version | Yes |
| Control maintenance window | Yes |
| Preview and Validate Patches for Zero-Regression SLO | No |

Additional Information

| Open Source DB | No |
|---|-------------------------|
| Delta Sharing / Cloud Links | Delta Sharing Recipient |
| Select AI to Generate SQL from Natural Language Prompts | Yes |
| Mongo-compatible API | Yes |
| Supports non-CDB home | No |

The Responsibility Model for Oracle Autonomous Database

| Task | Who | Details |
|---|----------|---|
| Provisioning Autonomous Database resources | Oracle | Oracle is responsible for provisioning resources. You the customer are responsible for initiating provisioning requests that specify configuration characteristics of the resource being provisioned. |
| Backing up databases | Oracle | Oracle is responsible for backing up databases on a daily basis and for retaining database backups for 60 days. |
| Recovering a database | Oracle | Oracle is responsible for recovering databases. You the customer are responsible for initiating a recovery request that specifies which existing backup to recover to. |
| Patching and upgrading | Oracle | Oracle is responsible for patching and upgrading all Autonomous Database resources. |
| Scaling | Oracle | Oracle is responsible for scaling Autonomous Databases. You the customer are responsible for initiating scaling requests. |
| Monitoring service health | Oracle | Oracle is responsible for monitoring the health of Autonomous Database resources and for ensuring their availability as per published guidelines. |
| Monitoring application health and performance | Customer | You the customer are responsible for monitoring the health and performance of your applications at all levels. This responsibility includes monitoring the performance of the database queries and updates your applications perform. |
| Application security | Customer | You the customer are responsible for the security of your applications at all levels. This responsibility includes Cloud user access to Autonomous Database resources, network access to these resources, and access to database data. Oracle ensures that data stored in Autonomous Databases is encrypted and ensures that connections to Autonomous Databases require TLS 1.2 encryption and wallet-based authentication. |
| Auditing | Oracle | Oracle is responsible for logging REST API calls made to Autonomous Database resources and for making these logs available to you the customer for auditing purposes. |
| | | Oracle is responsible for ensuring that Autonomous Databases are provisioned with Oracle Database auditing features enabled. You the customer are responsible for using these features to audit database usage. |
| Alerts and Notifications | Oracle | Oracle is responsible for providing an alert and notification feature for service events. You the customer are responsible for monitoring any database alerts that may be of interest. |
