

# Autonomous AI Database Dedicated in an Elastic Pool

All-in-One Datasheet Produced by DBExpert

## Overview

Autonomous Elastic Pool is a configuration option for the LAK-D and ATP-D services, allowing you to create a collection of ABD instances. Elastic pools help you improve operating efficiency and reduce costs by bringing all of your databases to the Cloud. This also supports consolidating resources and simplifying administration and operations by using Autonomous AI Database. When you need a large number of databases, that can scale up and down elastically without downtime, you can benefit by creating and using elastic pools.

Visit the [DB Expert Services Portfolio page](#) to get the latest version of this data sheet and see data sheets for all of the Oracle Cloud Database services.

## Deployment

|                                 |                                                                                                         |

## Capacity

|                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Configuration Options</b> | <p>When you create an elastic pool you select a pool size from a predefined set of pool sizes. Pool size determines how much you pay for compute as well as how many ECPUs you can provision in a given pool.</p> <p>There are several terms to use when you work with elastic pools:</p> <ul style="list-style-type: none"> <li>Pool Leader: Is the Autonomous Database instance that creates an elastic pool.</li> <li>Pool Member: Is an Autonomous Database instance that is added to an elastic pool.</li> <li>Pool Size: Is a value that you set when you create an elastic pool. The pool size must be one of the available elastic pool shapes.</li> <li>Pool Capacity: The pool capacity is the maximum number of ECPUs that an elastic pool can use, and is four times (x4) the pool size.</li> <li>Pool Shape: A pool shape is one of the valid pool sizes that you select when you create an elastic pool. The pool shape must be one of: 128, 256, 512, 1024, 2048, or 4096 ECPUs.</li> </ul> |
| <b>CPU Range</b>             | 128 to 16384 ECPUs                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

## Operational Controls

|                                                          |     |
|----------------------------------------------------------|-----|
| Allows installing additional software/agents on the host | No  |
| Allows installing OS packages                            | No  |
| Allows kernel changes                                    | No  |
| Allows OS runtime changes                                | No  |
| Allows sysdba access                                     | No  |
| Oracle operator access control                           | Yes |
| Control DB patch level                                   | Yes |
| Control DB release update (RU) level                     | Yes |
| Control DB version                                       | Yes |
| Control maintenance window                               | Yes |
| Preview and Validate Patches for Zero-Regression SLO     | Yes |

## Additional Information

|                                                         |                         |
|---------------------------------------------------------|-------------------------|
| Open Source DB                                          | No                      |
| Delta Sharing / Cloud Links                             | Delta Sharing Recipient |
| Select AI to Generate SQL from Natural Language Prompts | Yes                     |
| Mongo-compatible API                                    | Yes                     |
| Supports non-CDB home                                   | No                      |

## The Responsibility Model for Oracle Autonomous Database

| Task                                          | Who      | Details                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|-----------------------------------------------|----------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Provisioning Autonomous Database resources    | Oracle   | Oracle is responsible for provisioning resources. You the customer are responsible for initiating provisioning requests that specify configuration characteristics of the resource being provisioned.                                                                                                                                                                                                                                      |
| Backing up databases                          | Oracle   | Oracle is responsible for backing up databases on a daily basis and for retaining database backups for 60 days.                                                                                                                                                                                                                                                                                                                            |
| Recovering a database                         | Oracle   | Oracle is responsible for recovering databases. You the customer are responsible for initiating a recovery request that specifies which existing backup to recover to.                                                                                                                                                                                                                                                                     |
| Patching and upgrading                        | Oracle   | Oracle is responsible for patching and upgrading all Autonomous Database resources.                                                                                                                                                                                                                                                                                                                                                        |
| Scaling                                       | Oracle   | Oracle is responsible for scaling Autonomous Databases. You the customer are responsible for initiating scaling requests.                                                                                                                                                                                                                                                                                                                  |
| Monitoring service health                     | Oracle   | Oracle is responsible for monitoring the health of Autonomous Database resources and for ensuring their availability as per published guidelines.                                                                                                                                                                                                                                                                                          |
| Monitoring application health and performance | Customer | You the customer are responsible for monitoring the health and performance of your applications at all levels. This responsibility includes monitoring the performance of the database queries and updates your applications perform.                                                                                                                                                                                                      |
| Application security                          | Customer | <p>You the customer are responsible for the security of your applications at all levels. This responsibility includes Cloud user access to Autonomous Database resources, network access to these resources, and access to database data.</p> <p>Oracle ensures that data stored in Autonomous Databases is encrypted and ensures that connections to Autonomous Databases require TLS 1.2 encryption and wallet-based authentication.</p> |
| Auditing                                      | Oracle   | <p>Oracle is responsible for logging REST API calls made to Autonomous Database resources and for making these logs available to you the customer for auditing purposes.</p> <p>Oracle is responsible for ensuring that Autonomous Databases are provisioned with Oracle Database auditing features enabled. You the customer are responsible for using these features to audit database usage.</p>                                        |
| Alerts and Notifications                      | Oracle   | Oracle is responsible for providing an alert and notification feature for service events. You the customer are responsible for monitoring any database alerts that may be of interest.                                                                                                                                                                                                                                                     |
