

# Base Database Service - Standard Edition - ECPU

All-in-One Datasheet Produced by DB Services Explorer

## Overview

Oracle Standard Edition 2 on an elastic VM, managed using the Console, APIs, CLIs, Enterprise Manager, or SQL Developer. Standard Edition 2 includes Multitenant for up to three Pluggable Databases (PDBs), Machine Learning, and Spatial and Graph. Deploy up to 32 ECPUs. All of the Base Database Service editions include Data Safe and Oracle Database Transparent Data Encryption (TDE).

Visit the [DB Services Explorer Portfolio page](#) to get the latest version of this data sheet and see data sheets for all of the Oracle Cloud Database services.

## Deployment

<b>Database Type</b>	Single Database
<b>Management Model</b>	Co-managed PaaS
<b>Supported Cloud Environments (*)</b>	Oracle Cloud Infrastructure, Oracle Database@Azure and Oracle Database@Google Cloud
<b>SKUs for starting configuration</b>	B111585 (ECPU) or B111588 (ECPU BYOL) B111584 (DB storage) Backups - Oracle Database Autonomous Recovery Service - B95240 or Oracle Database Zero Data Loss Autonomous Recovery Service - B95241
<b>Oracle AI Database BYOL Support</b>	BYOL Standard Edition (SE)
<b>DB Versions Supported</b>	Oracle AI 26ai (Long-term release), Oracle 19c (Long-term release) (Oracle DB@Azure, Oracle DB@Google Cloud only)
<b>Hardware Infrastructure</b>	Shared General Purpose

## Usage Models

<b>Recommended Workloads</b>	Blockchain Graph Mixed Workload (Transaction + Analytics) Transaction Processing (OLTP) Vector
<b>Recommended Data Models</b>	Document Store (JSON) Document Store (XML) NoSQL

	Spatial Text Vector
<b>Certified Oracle Applications</b>	JD Edwards EnterpriseOne Tools 9.2.9.3 and later Oracle APEX AI Application Generator Oracle Fusion Middleware 14.1.2.0.0 Siebel Enterprise Server 25.2 and later

## Capacity

<b>Configuration Options</b>	Base Database Service supports flexible shapes. When you create an instance using a flexible shape, you select the number of ECPU's that you require for the workloads that run on the instance. Flexible shapes let you customize the number of ECPU's allocated to the instance. This flexibility lets you build instances that match your workload, enabling you to optimize performance and minimize cost. The amount of memory allowed is based on the number of ECPU's selected.
<b>CPU Range</b>	4 to 32 ECPU's in increments of 4
<b>Shapes</b>	VM.Standard.x86 ECPU's: 4 to 256 Max DB TB: 40
<b>CPU scaling</b>	Offline
<b>Storage scaling</b>	Online
<b>Max IOPs</b>	8K: 128k
<b>Max Throughput</b>	1000 MBPs
<b>Max Memory</b>	8 GB per 4 ECPU's up to 64 GB

## Availability

<b>Nines of availability (may require configuration)</b>	99.9 SLO
<b>Oracle DB Maximum Availability Architecture medals (for OCI / Cloud@Customer deployments)</b>	Bronze
<b>Automated backups max retention</b>	up to 95 days
<b>Long-term backup retention (up to 10 years)</b>	Yes

## Functionality Included

Included Oracle DB Options for license-included service (**)	Spatial and Graph
Included Oracle EM Packs for license-included service (**)	None
Free Add-Ons (no extra licensing required)	Oracle APEX AI Application Generator Oracle Data Safe Oracle GoldenGate 1) Limited Use Term License Promotion and 2) Oracle GoldenGate Database Migration Term (both available on Oracle Cloud Marketplace) Oracle REST Data Services (ORDS) SQL Developer Web

## Security and Compliance

Recommended for hosting sensitive data and candidate for compliance with non-audited programs (customer responsibility)	No
---	----

## Operational Controls

Allows installing additional software/agents on the host	Yes
Allows installing OS packages	Yes
Allows kernel changes	No
Allows OS runtime changes	Yes
Allows sysdba access	Yes
Oracle operator access control	No
Control DB patch level	Yes
Control DB release update (RU) level	Yes
Control DB version	Yes
Control maintenance window	Yes
Preview and Validate Patches for Zero-Regression SLO	No

## Additional Information

Open Source DB	No
Delta Sharing / Cloud Links	No
Select AI to Generate SQL from Natural Language Prompts	No
Mongo-compatible API	Yes
Supports non-CDB home	No

(\*) Capabilities may vary between cloud platforms. Please visit [Oracle Multicloud Capabilities](#) for more detailed information.

(\*\*) Check service documentation for feature availability and limitations

## Compliance Programs Achieved / Planned for Azure

C5 (Cloud Computing Compliance Controls Catalogue - Germany) - [Supported], CSA STAR Attestation - [Supported], CSA STAR Certification - [Supported], EU Cloud Code of Conduct (EU Cloud CoC), FISC (Center for Financial Industry Information Systems - Japan) - [Supported], GSMA (GSM Association) - [Supported], HDS (Hébergement de Données de Santé - France) - [Supported], HIPAA (Health Insurance Portability and Accountability Act) - [Supported], HITRUST (Health Information Trust Alliance) - [Supported], IRAP (Infosec Registered Assessors Program - Australia) - PROTECTED - [Supported], ISMAP (Information system Security Management and Assessment Program - Japan) - [Supported], ISO/IEC 20000-1 (Service Management) - [Supported], ISO/IEC 22301 (Business Continuity Management) - [Supported], ISO/IEC 27001 (Information Security Management) - [Supported], ISO/IEC 27017 (Information Security for Cloud Services) - [Supported], ISO/IEC 27018 (Personally Identifiable Information in Public Clouds) - [Supported], ISO/IEC 27701 (Privacy Information Management) - [Supported], ISO/IEC 9001 (Quality Management) - [Supported], MTCS (Multi-Tier Cloud Security - Singapore) - [Supported], PCI DSS (Payment Card Industry Data Security Standard) - [Supported], SOC 1 (System and Organization Controls 1) - [Supported], SOC 2 (System and Organization Controls 2) - [Supported], SOC 3 (System and Organization Controls 3) - [Supported]

### **Compliance Programs Achieved / Planned for Google Cloud**
